Week 1	Induction. Working Effectively & Safely in and Electrotechnical Environment	Working Safely GOLA 201
Week 2	Principles of Electrotechnology	Principles GOLA 202
Week 3	Application of Health & Safety and Electrical Principles	n/a
Week 4	Application of Health & Safety and Electrical Principles	Application GOLA 203
Week 5	Installation (Buildings and Structures)	Installation GOLA 205
Week 6	Practical Revision Theory completion (if necessary)	
Week 7	Practical Assessment: Wiring (206)	
Week 8	Practical Assessment: Testing & Faults (204)	
Week 8 +1	Assessment completion (if necessary)	

This course will run daily (Monday to Friday) for 8 weeks at the following times:

AM session: 8am to 12.15 (including short break mid-morning)

PM session: 12.45 to 4pm (including short break mid-afternoon)

Due to the intensive nature of the course, a generous proportion of the training time is allocated to practical sessions in the workshop. Consequently students need to dedicate time at evenings and weekends to preparation for each day's training by reading up on theory from the course materials provided.
